Education

- 09/2009 - present** **Southwest Jiaotong University**, Chengdu, Sichuan, China
Ph.D. candidate in Compute Science, advised by [Prof. Tianrui Li](#) & [Prof. Yi Pan](#)
Special Grade Scholarship for 5 years
- 09/2005 - 06/2009** **Southwest Jiaotong University**, Chengdu, Sichuan, China
Bachelor of Telecommunication Engineering in [the Mao Yisheng Honors Class](#)
Undergraduate Scholarship for 4 years

Experience

- 05/2013 - present** **Huawei Noah's Ark Lab**, Shatin, New Territories, Hong Kong
Research Intern with [Dr. Wei Fan](#)
Research and develop large-scale deep learning and feature engineering algorithms.
- Research on Transformational Learning (TL, the generation of deep learning). Using deep learning techniques with decision tree, model-based search tree or graphical models, TL can learn structure & high-level knowledge representations from most kinds of data, included sequences, graphs, images, etc. **The draft is being prepared.**
 - Proposed a novel deep learning model named SUGAR. SUGAR regularizes the network construction by utilizing similarity or dissimilarity constraints between data pairs, rather than sample-specific annotations. Such kind of side information is more flexible and greatly mitigates the workload of annotators. Secondly, unlike prior works, SUGAR decouples the supervision information and intrinsic data structure. SUGAR includes two heterogeneous networks, each of which encodes either supervision or unsupervised data structure respectively. **The work has been presented at [KDD 2014](#). Code: <https://github.com/lucktroy/sugar>.**
 - Proposed a novel algorithm (FSP-MbT) for mining discriminative and essential frequent sequential patterns via model-based search tree. It is the core component of the subsequent prediction model, which is used for the consumer complaint problem in the telecommunications industry. The related prediction system is being deployed and tested for real-world application, which includes millions of consumers. **Patent Pending.**
 - Proposed a locally linear deep learning model (LLDL) for large-scale stellar spectrum recognition. The characteristics of stellar spectra: the massive volume, ultrahigh dimensionality (>5K), and significantly low signal/noise ratio (<10). Using GPU, stochastic gradient descent (SGD) and Dropout, LLDL can model the locally linear structures found in the stellar spectra. Experimental results show that LLDL achieves up to 100% improvements over both popular deep neural networks and shallow SVM and Logistic Regression. **Paper is under review.**
- 05/2013 - present** **The Chinese University of Hong Kong**, Shatin, New Territories, Hong Kong
Research Assistant with [Prof. John C.S. Lui](#)
Research and develop large-scale deep learning and feature engineering algorithms.
- 02/2012 - 02/2013** **Georgia State University**, Atlanta, GA, USA
Research Assistant with [Prof. Yi Pan](#)
Research and develop parallel algorithms, large-scale algorithms in cloud computing and GPU cluster.

- Participated as a mentor in 8-week NSF REU Undergraduate Summer Research Program.
- Proposed large-scale feature selection algorithms, provide HADOOP and SPARK implementations.
- Proposed a composite relation for data fusion & a novel parallel matrix algorithm using multi-GPU.

08/2011 - 09/2011 Belgian Nuclear Research Centre (SCK-CEN), Mol, Belgium

Intern with [Dr. Klaas van der Meer](#)

Research and develop incremental and parallel algorithm for feature selection and knowledge acquisition.

Awards & Honors

- 2012, 2013** National Scholarship, China.
- 2012** “[Si Shi Yang Hua 诤实扬华](#)” Medal in [Southwest Jiaotong University](#), 2012. (Top 1/1000, the students’ top honor of Southwest Jiaotong University).
- 2009-2014** Special Grade Scholarship for PhD Students, [Southwest Jiaotong University](#).
- 2012** First Prize in the 9th National Postgraduate Mathematical Contest in Modeling, China.
- 2009, 2011** Second Prize in the 6th & 8th National Postgraduate Mathematical contest in Modeling, China.
- 2010** Second Prize (Top 10 in person) in the 2nd “Huawei Cup” Innovation Programming Contest, China.
- 2007, 2008** Second Prize (Top 10) in the 2nd Sichuan Provincial Programming Contest, China.
- 2007** Second Prize (12th Place in person) in the TopCoder Sichuan Provincial Contest, China.
- 2006, 2007** The President Scholarship, School of Information Science and Technology, Southwest Jiaotong University, China.
- 2005-2009** Undergraduate Scholarship of Southwest Jiaotong University, China.

Projects

- 11/2012 - present** Research on dynamic knowledge discovery techniques and efficient algorithms under granular computing, the Fostering Foundation for the Excellent Ph.D. Dissertation of Southwest Jiaotong University, China. Leader and principal investigator.
- 10/2012 - 10/2013** Dynamic knowledge discovery system based on rough sets in cloud computing environments, the Science and Technology Planning Project of Sichuan Province, China. Leader and principal investigator.
- 10/2011 - 09/2012** Research on dynamic knowledge discovery techniques under granular computing and probabilistic rough sets, and its fast algorithms based on cloud computing, the Doctoral Innovation Funding Project of Southwest Jiaotong University, China. Leader and principal investigator.
- 10/2011 - 09/2012** Research on dynamic knowledge discovery system based on cloud computing and rough sets, the Young Software Innovation Foundation of Sichuan Province, China. Leader and principal investigator.
- 05/2012 - 07/2012** 8-week NSF REU Undergraduate Summer Research Program hosted by the Department of Computer Science, Georgia State University, the National Science Foundation, USA. Participated as a mentor.
- 01/2012 - present** Research on dynamic updating knowledge theories and algorithms based on granular computing, the National Natural Science Foundation of China.
- 01/2012 - present** Research on composite rough set models and algorithms of knowledge discovery, the National Natural Science Foundation of China.
- 01/2009 - 12/2011** Research on incremental learning theories and methods based on granular computing, the National Natural Science Foundation of China.

Professional Activities

Review for Journal

- [ACM Transactions on Knowledge Discovery from Data \(TKDD\)](#)
- [IEEE Transactions on Computers \(TOC\)](#)
- [IEEE/ACM Transactions on Computational Biology and Bioinformatics \(TCBB\)](#)
- [IEEE Transactions on NanoBioscience](#)
- [World Wide Web Journal \(WWWJ\)](#)
- [International Journal of Cloud Computing \(IJCC\)](#)
- [International Journal of Bioinformatics Research and Applications \(IJBRA\)](#)
- [International Journal of Computational Intelligence Systems \(IJCIS\)](#)

Extracurricular Activities

- 04/2012** IBM Cloud Academy CON, NC, Research Triangle Park (RTP), North Carolina, USA.
- 12/2010** Workshop on Frontiers of Data Management, Soochow University, Suzhou, China.
- 11/2010** Workshop on Massive Data Mining and Knowledge Discovery, Southwest Jiaotong University, Chengdu, China.
- 11/2010** China Computer Federation Advanced Disciplines Lectures (the 11th issue) - Massive Data Mining and Knowledge Discovery, Southwest Jiaotong University, Chengdu, China.
- 08/2010** Intel Software College - Multi-core Programming for Academia, Fudan University, Shanghai, China.
- 07/2010** National Graduate Summer School - Data Intensive Computing and Unstructured Data Management, Renmin University of China, Beijing, China.

- 12/2009** Workshop on Massive Data Mining and Knowledge Discovery, Southwest Jiaotong University, Chengdu, China.
- 08/2009** National Graduate Summer School (Dragon Star Plan) - Data Mining, Zhejiang University, Hangzhou, China.

Skills

Operating System Linux-based OS (e.g., Cent OS, Ubuntu), Mac OS, Windows XP, Windows 7/8

Programming C/C++, [CUDA C](#) (for NVIDIA GPUs), Python, Java, Shell and various languages with practical experiences.

Others [Hadoop/Spark/Phoenix++/Twister](#) (MapReduce-like Softwares), [GraphChi](#) (Graph Computing System), [Theano/Pylearn2](#) (GPU-based Deep Learning in Python), [Scikit-learn](#) (Machine Learning in Python), [Weka](#) (Data Mining Software in Java), Matlab, L^AT_EX, MS Office (e.g., Visio, Word, Excel, PowerPoint)

Languages

Chinese (native), English (fluent)
